R2X Raised Floor Box

The R2X low profile floor box (3 5/16" - 84 mm) provides a great solution for most raised floor applications such as stage floors, wood structured floors and raised access floors.

The floor box offers several faceplate configurations to accept a wide variety of power, data and audio-video connectors as well as the Fit-IN modular system which increases and optimizes the floor box capacity.

The floor box covers are available in brass, stainless steel and black painted steel with several options such as beveled edges, straight flush edges, flat top surface or provided with a recessed space 7/16" (12 mm) for the installation of any floor covering material such as carpet, terrazzo, tile etc. The covers are provided with two handles and cable guards to protect and reduce risk of damage to all incoming and outgoing cables.
